PROFESSIONAL SUMMARY

Software Engineer with 4 years building production-grade systems in Node.js, Express.js, Laravel (PHP), and MongoDB. Specialized in real-time architectures (Socket.io/WebRTC), multi-tenant SaaS platforms, and AI/LLM integrations — including OpenAI GPT, Google Gemini, and LangChain-based RAG pipelines. Proven track record delivering scalable REST APIs, payment systems (Stripe, Braintree), and intelligent document Q&A products in fast-paced Agile environments.

TECHNICAL SKILLS

Backend	Node.js, Express.js, Laravel (PHP), REST APIs, WebSockets (Socket.io), Event-Driven Architecture, JWT, OAuth2 (Passport)
Frontend	HTML5, CSS3, JavaScript (ES6+), Bootstrap, jQuery, Responsive Web Design
AI / ML	LLM Integration (OpenAI GPT, Google Gemini, Llama), LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, Vector Embeddings (FAISS, ChromaDB)
Databases	MongoDB, MySQL, Schema Design, Query Optimization, Multi-Tenant Data Isolation, Indexing, Caching
Cloud & Storage	AWS S3, Azure Blob, Google Drive API, Dropbox API, OneDrive API, Google Cloud Storage (GCS)
Payments	Stripe, Braintree, Subscription Billing, MaxMind GeoIP2, IP-Based Dynamic Pricing
DevOps & Tools	Git, GitHub, VS Code, CI/CD, Hostinger, GoDaddy, DNS Configuration, SPF & Email Authentication, Laravel Socialite
SEO & Analytics	SEO Optimization, Google Analytics, Google Search Console, SEMrush

PROFESSIONAL EXPERIENCE

Software Engineer

Oct 2024 – Present

WebWings Global Solution Pvt. Ltd. — Bangalore, India

- Architected multi-tenant SaaS backend systems using Node.js, Express.js, and Laravel (PHP), ensuring secure data isolation and scalability
- Engineered high-performance REST APIs handling 5K+ concurrent users with optimized response times.
- Launched WebSocket (Socket.io) game services enabling sub-100ms player interaction and live state sync for real-time gameplay.
- Deployed AWS S3, Azure Blob storage, and Stripe/Braintree payment integrations with full webhook pipelines and error recovery.
- Enforced JWT and OAuth2 (Passport.js) security flows with granular role-based permissions spanning admin, operator, and end-user tiers.
- Embedded OpenAI GPT, Google Gemini, and LangChain into client products to power intelligent chatbot and document Q&A features.

Software Developer

Sep 2022 – Sep 2024

Herody — India

- Developed RESTful APIs and backend systems using Laravel (PHP), including optimized GET endpoints for efficient data retrieval.
- Implemented query optimization, pagination, and indexing in Laravel APIs to improve performance for large datasets
- Streamlined multi-client database operations through session-based dynamic DB context switching in Laravel.
- Oversaw Git workflows and CI/CD deployments via GitHub and Hostinger, ensuring reproducible and stable release cycles.
- Configured DNS, SPF, and DKIM/DMARC records, establishing verified and secure email delivery for client domains.
- Collaborated with product, design, and QA squads in Agile/Scrum sprints, consistently hitting delivery milestones.

PROJECTS

Multiplayer Poker Platform

- Developed a deployment-ready real-time poker backend supporting multi-table tournaments (MTT) with concurrent seat management.
- Designed a game engine via Socket.io covering player actions, pot calculation, and synchronized board state delivery.
- Built a tournament logic engine governing elimination rules, blind structure progression, player ranking, and matchmaking.
- Integrated real-time audio/video communication using WebRTC (via SFU architecture such as LiveKit/WebRTC servers) to enable player interaction during gameplay.
- Engineered resilient disconnect/reconnect flows and game-state recovery, guaranteeing zero-interruption sessions under unstable networks.
- Structured the platform for horizontal scaling using event-driven architecture, ready for high-traffic environments.

AI-Powered Knowledge Chatbot (RAG System)

- Crafted an AI-powered knowledge chatbot on a RAG pipeline with LangChain and vector embeddings stored in FAISS/ChromaDB.
- Wired three LLM providers (OpenAI GPT, Google Gemini, Llama) behind a provider-agnostic abstraction for availability and cost control.
- Enabled document Q&A over PDF, plain text, and live website sources, producing accurate and context-rich answers.
- Applied advanced prompt engineering to sharpen response relevance and sustain retention over long conversations.
- Spearheaded a high-throughput Node.js query backend with streaming responses and isolated per-session memory.

Multi-Tenant Admin & SaaS Web Platform

- Established high-capacity REST APIs using Laravel, ensuring efficient data retrieval and strict tenant data segregation
- Developed Laravel-based APIs with optimized GET endpoints, implementing pagination, indexing, and query optimization for large datasets
- Designed multi-tenant architecture with secure data isolation and independent configurations per client
- Integrated Stripe and Braintree for subscription billing, recurring payments, and webhook-driven lifecycle management
- Implemented role-based access control (RBAC) for admin, sub-admin, and user-level permissions
- Improved API performance through MongoDB query optimization, compound indexing, and caching strategies

Toober OTT Streaming Platform

- Launched RESTful APIs for an OTT video platform supporting geo-specific subscription tiers; coordinated with the frontend team to align backend changes and AI integrations.
- Introduced MaxMind GeoIP2 for IP-based regional pricing and wired Braintree for recurring billing and plan lifecycle management.

Ingystion Data Ingestion System

- Orchestrated an FTP/XML ingestion pipeline with auto-binding, failure tracking, and status flags for comprehensive job monitoring.
- Consolidated 6+ storage providers (AWS S3, Azure Blob, GCS, Google Drive, Dropbox, OneDrive) through a single Laravel Socialite OAuth layer.
- Implemented unified OAuth authentication layer using Laravel Socialite for seamless third-party integrations

EDUCATION

Bachelor of Technology (B.Tech)

AKU University, Bihar, India

2016 – 2020

LANGUAGES

English (Professional Proficiency) • Hindi (Native)
